Finance Core: Financial Modeling, Fundamental & Ratio Analysis, Valuation, Financial Reporting, Economics, Statistics

Data & Tools: TradingView, Advanced Excel, Power BI, DAX, Python, SQL

WORK EXPERIENCE

D. E. Shaw India Private Limited | Member Technical (F&O Trading Desk)

May 2022 – Jan 2024

- Developed Python-based market research pipelines to ingest, clean, and analyze Futures & Options market data, including option chain, spot/futures prices, open interest, implied volatility, and Greeks, enabling real-time research for the derivatives trading desk.
- Built quantitative analytics and automated reporting tools to identify long build-up, short build-up, short covering, and long unwinding by correlating price, volume, and open interest, significantly reducing manual analysis for traders.
- Designed dashboards and daily technical research reports integrating technical indicators (RSI, MACD, Bollinger Bands, moving averages), volatility analysis, and option-strategy metrics (straddles, strangles, spreads) to support data-driven trading decisions.

Arcesium India Private Limited | Site Reliability Engineer (Internship)

Jan 2022 – May 2022

- Debugged and optimized database issues, ensuring high availability of EC2 and RDS services.
- Managed MS SQL and PostgreSQL operations and improved query performance; researched Flyway for automated schema/version control.

PROJECTS

Daily, Weekly & Monthly Technical Research Reports: Nifty, Bank Nifty & Commodities | Excel, Python | [GitHub](#)

- Prepared technical research notes across indices and commodities (Gold, Crude Oil) on daily, weekly, and monthly timeframes, applying support/resistance, candlestick patterns, Fibonacci retracement, Bollinger Bands, RSI, MACD, and ATR to generate buy/sell/hold recommendations with entry, target, and volatility-based stop-loss levels.
- Automated report generation with a Python pipeline pulling live market data, cutting preparation time and keeping levels current.

Multi-Strategy Technical Backtester: Nifty & Bank Nifty | Python | [GitHub](#)

- Backtested eight technical strategies across trend-following, mean-reversion, and breakout systems over six years; benchmarked CAGR, Sharpe, Sortino, max drawdown, win-rate, and profit factor against buy-and-hold to validate strategies before acting on them.

Multi-Asset Technical Coverage Watchlist: Equities & Commodities | Excel, Python | [GitHub](#)

- Built a sector-grouped, multi-timeframe (daily + weekly) watchlist scoring NSE stocks and commodities on trend, momentum, candlestick patterns, and key levels to flag buy/sell setups with stop-losses for relationship-manager support.

EDUCATION

MBA in Finance, University College of Commerce & Business Management, Hyderabad

2024 – 2026

CGPA: 8.9

B.E. in Computer Science & Engineering, Chaitanya Bharathi Institute of Technology, Hyderabad

2018 – 2022

CGPA: 8.8

ACHIEVEMENTS

- Scored 95.6 percentile in UGC NET 2025 (Management) and top 5% in GATE CSE 2021.
