

SAIKUMAR KALERU

QUANT / DERIVATIVES ANALYST

Hyderabad | +91 9398320218 | saikumarkaleru56@gmail.com | linkedin.com/in/saikumar-kaleru

PROFESSIONAL SUMMARY

Quant and Derivatives analyst with a B.E. in Computer Science (GATE CSE top 5%) and an MBA in Finance, NISM Series-XV certified, with close to two years on a Futures and Options trading desk. Good at options pricing and Greeks, volatility modeling with implied volatility and GARCH, systematic strategy backtesting, and Python and SQL for building and checking quantitative models. Comfortable going from pricing theory to working code, from implied vol solving to Greek validation to vectorized backtesting on real F&O data.

SKILLS

Quantitative & Programming: Python (pandas, NumPy), SQL, vectorized backtesting, time series analysis, statistics and probability

Derivatives & Pricing: Options and futures, option Greeks, implied volatility, Black-Scholes, Monte Carlo simulation, GARCH, delta hedging, payoff and risk modeling

Technical & Market Analysis: Moving averages, RSI, MACD, signal generation, open interest, F&O and commodity markets

Finance Core: Financial modeling, valuation, economics, statistics

Tools & Databases: Advanced Excel, Power BI, TradingView, MS SQL, PostgreSQL

WORK EXPERIENCE

D. E. Shaw India Private Limited | Member Technical (F&O Trading Desk)

May 2022 to Jan 2024

- Analysed derivatives market data and built analytics for implied volatility, open interest, and option Greeks across the F&O universe.
- Evaluated option strategies such as straddles, strangles, and spreads for risk and return.
- Built Python pipelines to capture and analyse F&O market data, which made the desk's analytics faster and more accurate.

Arcesium India Private Limited | Site Reliability Engineer (Intern)

Jan 2022 to May 2022

- Fixed production database issues and kept EC2 and RDS services available.
- Managed MS SQL and PostgreSQL databases and improved slow queries.
- Tested Flyway for automated schema migration and version control.

PROJECTS

Black-Scholes Option Pricer & Greeks | Python

- Built Black-Scholes pricing with the full first and second order Greeks, an implied vol solver, and a live implied vol smile from a real option chain.
- Checked analytic Greeks against finite difference estimates and cross checked prices with a binomial tree and Monte Carlo before using the model.

Options Strategy Payoff Analyzer | Python

- Built 16 strategies from a Leg and Position design, computing payoff and P&L, net Greeks, probability of profit, and a spot and vol scenario grid.
- Compared strategies on a like for like risk basis to guide selection under different volatility views.

Multi-Strategy Systematic Backtester: Nifty & Bank Nifty | Python

- Built a vectorized pandas and NumPy backtesting engine for eight strategies over six years, reporting CAGR, Sharpe, Sortino, max drawdown, and profit factor.
- Removed look ahead bias and benchmarked every strategy against buy and hold.

EDUCATION

MBA in Finance, University College of Commerce & Business Management, Hyderabad

2024 to 2026

CGPA: 8.9

B.E. in Computer Science & Engineering, Chaitanya Bharathi Institute of Technology, Hyderabad

2018 to 2022

CGPA: 8.8
