

SAIKUMAR KALERU

QUANT DEVELOPER / QUANTITATIVE TECHNOLOGY

Hyderabad, India | +91 9398320218 | saikumarkaleru56@gmail.com | linkedin.com/in/saikumar-kaleru

PROFESSIONAL SUMMARY

Quant developer with a B.E. in Computer Science and an MBA in Finance, mixing software engineering with real markets knowledge. Spent close to two years at D. E. Shaw as Member Technical on a Futures and Options trading desk, building C++ and Python systems, market data pipelines, and analytics for implied volatility and option greeks. I wrote a C++20 limit order book with a price and time priority matching engine. My NISM Series-XV (Research Analyst) certification and MBA add options, futures, and market microstructure fluency. Ranked in the top 5% in GATE CSE 2021.

TECHNICAL SKILLS

Languages: C++ (C++20), Python, SQL, Java, Bash

Trading Systems: order matching and limit order books, price and time priority, market data distribution, low latency design, multithreading, benchmarking

Quant & Data: NumPy, pandas, statistics and probability, time series and market data, ETL, PostgreSQL, MS SQL, DuckDB

Finance Domain: options and futures, implied volatility, option greeks, open interest, derivatives analytics

Tooling: CMake, pytest, WebSockets, Git, Linux, Docker

Core CS: Data Structures & Algorithms, OOP, Operating Systems, DBMS, Computer Networks, System Design

EXPERIENCE

D. E. Shaw India Pvt. Ltd. | Member Technical

May 2022 to Jan 2024

Trading Desk Systems, F&O Trading Desk

- Built and maintained C++ and Python systems and data pipelines for a Futures and Options trading desk.
- Captured and processed live market data and fed analytics covering implied volatility, option greeks, and open interest.
- Used multithreading and profiling to keep latency sensitive code fast and stable.
- Built analytics tools and daily reports that the desk used to track the market.

Arcesium India Pvt. Ltd. | Site Reliability Engineer (Intern)

Jan 2022 to May 2022

Databases and Reliability

- Kept AWS EC2 and RDS services available and fixed production database issues.
- Managed MS SQL and PostgreSQL databases and improved slow queries.
- Tested Flyway for automated database schema migration and version control.

PROJECTS

Low Latency Order Book | C++20, Python, WebSockets

- Built a limit order book with a price and time priority matching engine in C++20.
- Designed cache aware data structures and tight hot paths for insert, cancel, and match, then used profiling and benchmarking to cut per order latency.
- Added Python bindings and a WebSocket server that streams order book state to a web GUI.

Data Pipeline (ETL) & Analytics | Python, pandas, SQL

- Built an ETL pipeline that ingests raw data, transforms it with pandas, and loads it into a SQL database.
- Added data quality checks and SQL analytics, the kind of market data plumbing a quant desk relies on.

EDUCATION

B.E. Computer Science & Engineering, CBIT, Hyderabad

2018 to 2022

Chaitanya Bharathi Institute of Technology · CGPA 8.8

MBA in Finance, UCCBM, Hyderabad

2024 to 2026

University College of Commerce & Business Management · CGPA 8.9

RELEVANT COURSEWORK

Data Structures & Algorithms, Operating Systems, DBMS, Computer Networks, Object Oriented Programming, Design & Analysis of Algorithms, Software Engineering, Computer Architecture

CERTIFICATIONS

NISM Series-XV: Research Analyst (SEBI/NISM), Reg. No. NISM-202600123995

HackerRank: Problem Solving and Java (Basic) Programming

ACHIEVEMENTS

- GATE CSE 2021: top 5% among national candidates in Computer Science.
- UGC NET 2025 (Management): 95.6 percentile.
