

CA Final — Study Plan

The last level. **6 papers, 2 groups**, 30% MCQ + 70% descriptive. You can appear in the **last 6 months of articleship**, and a **6-month study period after training** applies. Register for Final early in articleship (registration is valid 10 years).

The 6 papers

Grp	Paper
1	P1 Financial Reporting (Ind AS heavy)
1	P2 Advanced Financial Management (your MBA strength)
1	P3 Advanced Auditing, Assurance & Professional Ethics
2	P4 Direct Tax & International Taxation
2	P5 Indirect Tax Laws (GST + Customs)
2	P6 Integrated Business Solutions (multidisciplinary, open-book , case-study based)

Prerequisites to *sit* Final (all must be done)

- ☐ Both Intermediate groups cleared
- ☐ Articleship: at least in the last 6 months (Final attempt window)
- ☐ **All 4 self-paced modules passed** (>50% each) — see `02_SelfPaced_Modules.md`
- ☐ **Advanced ICITSS** completed (Adv. IT + Management & Communication Skills) — *after* practical training, *before* the Final exam

Timing strategy (fastest path)

- Because articleship is full-time work, **build Final prep gradually across the 2 years**, not just at the end:
- Year 1 of articleship**: SET A & B modules + start **Financial Reporting** and **AFM** (concept-heavy, benefit from early exposure; AFM overlaps your MBA finance).
- Year 2**: taxes (DT + IDT — most amendment-sensitive, so study the edition applicable to your attempt), Audit, and practice for **Integrated Business Solutions** (case studies — practice writing, since it's open-book but time-pressured).
- Advanced ICITSS**: schedule it so it finishes *before* your Final attempt but doesn't collide with your peak revision — ideally in a lighter stretch of year 2.
- 6-month study leave**: you're generally entitled to study leave near the end of articleship — use it for full timed revision + mocks.

Study method (same discipline as Inter, higher depth)

- **ICAI BoS material + RTP + MTP + past papers + Suggested Answers** — all free, all essential.
- **Financial Reporting:** master Ind AS with practice problems; maintain a standards summary.
- **AFM:** leverage your finance base — focus on presentation and coverage of newer topics.
- **DT & IDT:** amendment-driven — keep a live amendments sheet for your exam edition; heavy practice.
- **Integrated Business Solutions:** practice full case studies under time; know how to *navigate* the open-book, not read it fresh in the exam.
- **Mocks:** attempt all ICAI MTPs full-length and timed in the final 6–8 weeks.

After clearing both groups

- Complete any remaining requirement, then **apply for ICAI membership** → you're a **Chartered Accountant**. 🎓
