

SAIKUMAR KALERU

FINANCIAL ANALYST · FP&A

Hyderabad, India | +91 9398320218 | saikumarkaleru56@gmail.com | [linkedin.com/in/saikumar-kaleru](https://www.linkedin.com/in/saikumar-kaleru)

PROFESSIONAL SUMMARY

Financial analyst with an MBA in Finance and a B.E. in Computer Science, NISM Series XV certified and CA Intermediate in progress, with close to two years of capital markets experience at D. E. Shaw. Strong in three-statement modeling, budgeting and forecasting, variance analysis, and financial statement analysis, and fluent in Excel, SQL, and Python for building models and dashboards. Comfortable turning drivers into a forecast, explaining budget versus actual, and reporting KPIs to management.

SKILLS

FP&A & Planning: Budgeting and forecasting, driver based planning, variance analysis (budget vs actual), three-statement modeling, scenario and sensitivity analysis, month-end close and reporting, KPI dashboards

Financial Analysis: Financial statement analysis, ratio analysis, DuPont, cash flow analysis, GAAP and IFRS basics

Corporate Finance & Costing: Cost of capital, working capital, capital budgeting (NPV, IRR), cost and management accounting

Data & Tools: Advanced Excel, Power BI, DAX, SQL, Python (pandas, NumPy)

Reporting: Management reporting, data storytelling, presentations

EXPERIENCE

D. E. Shaw India Pvt. Ltd. | Member Technical (F&O Trading Desk) May 2022 to Jan 2024

- Built analytics tools and dashboards the desk used to monitor volatility, exposure, and positioning across the F&O universe day to day.
- Tracked figures against expectations each day and explained the drivers behind the moves in a form the desk could act on.
- Prepared daily and weekly reports on market data and volatility that the desk relied on for its decisions.
- Built and maintained automated Python pipelines that captured, cleaned, and processed daily F&O market data, which replaced manual steps and improved the speed and accuracy of reporting.
- Evaluated option strategies such as straddles, strangles, and spreads on a risk and return basis, working to daily deadlines with high ownership.
- Turned daily figures into simple dashboards and short commentary that management could act on.

Arcesium India Pvt. Ltd. | Site Reliability Engineer (Intern) Jan 2022 to May 2022

- Kept AWS EC2 and RDS services highly available and resolved production database issues.
- Managed and optimized MS SQL and PostgreSQL databases and improved slow running queries.

PROJECTS

Integrated Three Statement Model: Driver Based 5 Year Forecast with Scenarios (MSFT) | Python, Excel

- Built a linked income statement, balance sheet, and cash flow with a driver based forecast that stays balanced.
- Ran base and downside scenarios and a simple valuation off the forecast cash flows.
- Built it as a Python model with a clean Excel output for review.

Budget vs Actual Variance Analytics: Price, Volume & Cost Bridge with Commentary | Python, Excel

- Built a budget versus actual variance analysis with a waterfall and a by-product breakdown of the gaps.
- Explained price, volume, and cost drivers behind each variance for a management view.
- Highlighted the largest adverse variances for a one-page management summary.

Peer Financial Benchmarking Suite: Ratios, DuPont & Earnings Quality across 5 Big Tech Firms | Python, Excel

- Built a ratio and DuPont analysis covering leverage, margins, and returns with peer benchmarking.
- Benchmarked five large cap peers (Apple, Microsoft, Alphabet, Meta, Amazon) with earnings quality checks and packaged it as a tested Python module with charts.
