

SAIKUMAR KALERU

PRODUCT CONTROL / FINANCIAL CONTROL ANALYST

Hyderabad | +91 9398320218 | saikumarkaleru56@gmail.com | linkedin.com/in/saikumar-kaleru

PROFESSIONAL SUMMARY

Product Control analyst and MBA Finance candidate, NISM Series-XV certified, with close to two years on a Futures and Options trading desk analysing P&L drivers, market data, and derivatives exposures. Good at P&L attribution, price verification, and reconciliation, and use Python and SQL to automate controls, validate data, and produce daily reporting. Comfortable producing and attributing daily P&L, running independent price verification and reconciliations, and substantiating balances at month end. Evidence exceptions clearly so the numbers hold up to review.

SKILLS

Product Control: Daily P&L production and attribution, independent price verification (IPV), balance sheet substantiation, reconciliations, month end close, controls and reporting

Markets & Products: Options and futures, option Greeks, implied volatility, fair value and mark to market, trade lifecycle

Quantitative & Programming: Python (pandas, NumPy), SQL, Advanced Excel, statistics

Finance Core: Financial reporting, accounting basics, valuation, corporate finance

Tools: Power BI, DAX, MS SQL, PostgreSQL

WORK EXPERIENCE

D. E. Shaw India Private Limited | Member Technical (F&O Trading Desk)

May 2022 to Jan 2024

- Supported the F&O desk by analysing daily market data, valuations, and exposures.
- Tracked implied volatility, open interest, and option Greeks to explain moves in position values.
- Prepared daily reports reconciling market data and flagging anomalies for quick resolution.
- Built Python pipelines to capture and validate data, which improved the accuracy of daily analytics.

Arcesium India Private Limited | Site Reliability Engineer (Intern)

Jan 2022 to May 2022

- Fixed production database issues and kept EC2 and RDS services available.
- Managed MS SQL and PostgreSQL databases and improved slow queries.
- Tested Flyway for automated schema migration and version control.

PROJECTS

Daily P&L Attribution Engine | Python, Excel

- Built a tool that splits daily P&L into price, volatility, and time decay for an options book and isolates the unexplained residual.
- Automated a reconciliation between model P&L and mark to market to surface breaks for investigation.

Independent Price Verification (IPV) & Data Quality Checks | Python, SQL

- Checked market prices against independent sources with tolerance thresholds and flagged stale or outlier marks for review.
- Logged every breach with source and timestamp so price challenges are auditable across the month end cycle.

Reconciliation & Reporting Dashboard | Excel, Power BI

- Automated position and P&L reconciliation with an exception dashboard, which cut manual effort and improved visibility.
- Grouped breaks by type and age so the control team sees a clear daily exception view.
