

SAIKUMAR KALERU

RISK ANALYST, MARKET & CREDIT RISK

Hyderabad | +91 9398320218 | saikumarkaleru56@gmail.com | linkedin.com/in/saikumar-kaleru

PROFESSIONAL SUMMARY

Market and Credit Risk analyst with a B.E. in Computer Science and an MBA in Finance, NISM Series-XV certified, with close to two years on a Futures and Options trading desk tracking implied volatility, open interest, and option Greeks. Good at Value at Risk, GARCH volatility modeling, derivatives and option strategy risk, and Python and SQL for risk analytics and reporting. Comfortable computing VaR and Expected Shortfall several ways, backtesting model accuracy with Kupiec and Christoffersen tests, and turning market, credit, and counterparty exposures into clear risk reports.

SKILLS

Risk Management: Market risk, credit risk, counterparty risk, Value at Risk, Expected Shortfall, GARCH volatility modeling, stress and scenario analysis, regulatory frameworks (Basel, FRTB), risk adjusted returns (Sharpe, Sortino)

Quantitative & Programming: Python (pandas, NumPy), SQL, backtesting, statistics and probability, Advanced Excel

Derivatives & Markets: Options and futures, implied volatility, straddles, strangles, and spreads, commodity and F&O markets, open interest

Finance Core: Financial modeling, valuation, ratio analysis, economics, financial reporting

Tools: Power BI, DAX, TradingView, MS SQL, PostgreSQL

WORK EXPERIENCE

D. E. Shaw India Private Limited | Member Technical (F&O Trading Desk)

May 2022 to Jan 2024

- Tracked implied volatility, open interest, and option Greeks across the F&O universe to monitor the desk's exposure.
- Evaluated option strategies such as straddles, strangles, and spreads for risk and return.
- Built Python pipelines to capture and analyse F&O market data, which made the desk's analytics faster and more accurate.

Arcesium India Private Limited | Site Reliability Engineer (Intern)

Jan 2022 to May 2022

- Fixed production database issues and kept EC2 and RDS services available.
- Managed MS SQL and PostgreSQL databases and improved slow queries.
- Tested Flyway for automated schema migration and version control.

PROJECTS

Value at Risk (VaR) Model | Python

- Built a VaR model on a real 8 asset portfolio computing 1 day 95% and 99% VaR three ways (historical, parametric, Monte Carlo via Cholesky), plus Expected Shortfall and component and marginal VaR.
- Backtested exception counts against the confidence level and split VaR into component and marginal parts to find the main risk drivers.

Credit Risk Scoring (Altman Z-Score) | Python

- Scored real issuers with the Altman Z-score and a Merton distance to default, and compared the accounting and market views.
- Flagged where the two signals disagree, then added up default probabilities into a portfolio expected loss.

Multi-Strategy Backtester & Risk Metrics: Nifty & Bank Nifty | Python

- Built a backtesting engine measuring max drawdown, Sharpe, Sortino, and profit factor across eight strategies over six years, with no look ahead bias.
- Ranked strategies on drawdown and consistency rather than headline return.

EDUCATION

MBA in Finance, University College of Commerce & Business Management, Hyderabad

2024 to 2026

CGPA: 8.9

B.E. in Computer Science & Engineering, Chaitanya Bharathi Institute of Technology, Hyderabad

2018 to 2022

CGPA: 8.8
