

Morning Research Note

Prepared by Saikumar Kaleru · Technical Research Desk *Sample report — for educational use, not investment advice.*

Market Overview

Global cues are constructive this morning. Wall Street closed higher overnight (Dow **+0.4%**, Nasdaq **+0.7%**) as US 10-year yields cooled; the **Dollar Index** eased to **104.2** and **Brent crude** held near **\$82**. **GIFT Nifty** is trading about **30 points higher**, pointing to a flat-to-positive open. **FIIs** were net buyers of **₹1,240 cr** yesterday while **DII**s sold ₹380 cr. **India VIX** is subdued at **12.8**, signalling low expected volatility — a calm, range-with-upward-bias backdrop.

Nifty 50 — View: Mildly Bullish

Nifty closed at **24,050**, holding above its **20-DMA (23,880)** and reclaiming the psychological **24,000** level. **RSI at 58** is neutral-to-positive and **MACD** is on the verge of a bullish crossover. On the option chain, the **highest call OI sits at 24,300** (resistance) and the **highest put OI at 23,800** (support), with **PCR at 1.06** — a balanced, slightly bullish setup.

View: Buy dips toward **23,950** with a stop below **23,800**, for a move to **24,200 → 24,400**. A close below 23,800 turns the bias neutral.

	Support	Resistance
Nifty 50	23,950 / 23,800	24,200 / 24,400

Bank Nifty — View: Bullish

Bank Nifty (**52,180**) has broken out of its consolidation and trades **above all key moving averages** with the 20-DMA rising above the 50-DMA. Banking is the strongest sector on relative strength this week.

Call: BUY above **52,200** · **Targets** 52,600 / 53,000 · **Stop-loss** 51,700 (closing basis) · **Horizon** 2–3 sessions · **Rationale:** breakout + sector leadership + supportive put OI at 52,000. Reward:risk ≈ **1:2**.

Commodity — Gold (MCX)

Gold is consolidating in a tight range. A softer dollar keeps the bias **positive above ₹71,500 support**, with resistance at **₹72,800**. A daily close above 72,800 would open ₹73,500.

Stock Ideas

- **RELIANCE — BUY** above **1,355** · Target **1,395** · Stop **1,330** · reclaimed its 50-DMA on rising volume; a bullish engulfing candle at support.
- **INFY — AVOID / SELL** below **1,540** · Target **1,490** · Stop **1,565** · trading below its 50-DMA with a bearish MACD; the IT sector shows weak relative strength versus Nifty.

Levels at a Glance

Instrument	Support	Resistance	View
Nifty 50	23,950 / 23,800	24,200 / 24,400	Mildly Bullish
Bank Nifty	51,800	52,600 / 53,000	Bullish
Gold (MCX)	71,500	72,800	Positive

How to read this note

Each call states an **entry, target(s), stop-loss, horizon and rationale** — never a level without a stop. Views are **probabilistic**: "favourable risk-reward above X," not "this will go up." The **invalidation** level tells you when the idea is wrong.

Disclaimer: This is a sample note for educational purposes only and is not investment advice. Technical views are probabilistic; always use a stop-loss. A SEBI-registered Research Analyst must disclose any holding/interest in the securities mentioned — none are held for this sample.
