

SAIKUMAR KALERU

DATA ENGINEER

Hyderabad, India | +91 9398320218 | saikumarkaleru56@gmail.com | linkedin.com/in/saikumar-kaleru

PROFESSIONAL SUMMARY

Data engineer with a B.E. in Computer Science and a solid grip on databases, data structures, algorithms, and operating systems. I build ETL pipelines and data models in Python (pandas, NumPy) and SQL, with an eye on data quality and validation. Spent close to two years at D. E. Shaw as Member Technical on a Futures and Options trading desk, building data pipelines that captured and processed live market data, and tuned MS SQL and PostgreSQL databases at Arcesium. Ranked in the top 5% in GATE CSE 2021.

TECHNICAL SKILLS

Languages: Python (pandas, NumPy), SQL (advanced), C++, Java, Bash

Data Engineering: ETL and data pipelines, data modeling, data quality and validation, SQL analytics

Databases: PostgreSQL, MS SQL, SQLite, DuckDB, query tuning, schema and version control (Flyway)

Tools & Platforms: Power BI, Git, Docker, Linux, AWS (EC2, RDS), pytest

Core CS: Data Structures & Algorithms, DBMS, Operating Systems, OOP, Computer Networks, System Design

EXPERIENCE

D. E. Shaw India Pvt. Ltd. | Member Technical

May 2022 to Jan 2024

Data Pipelines and Systems Engineering, F&O Trading Desk

- Built and maintained automated data pipelines in C++ and Python that captured and processed live market data.
- Modeled processed data into clean, queryable schemas and tuned SQL queries so downstream reports finished on time.
- Added validation and fault handling so late or malformed records did not corrupt downstream stores.
- Built analytics tools and daily reports on top of the processed datasets.

Arcesium India Pvt. Ltd. | Site Reliability Engineer (Intern)

Jan 2022 to May 2022

Databases and Reliability

- Managed MS SQL and PostgreSQL databases and improved slow queries with indexes and rewrites.
- Kept AWS EC2 and RDS services available and fixed production database issues.
- Tested Flyway for automated database schema migration and version control.

PROJECTS

Data Pipeline (ETL) | Python, pandas, SQL

- Built an ETL pipeline that ingests raw data, transforms it with pandas and SQL, and loads it into a relational database.
- Added data quality checks and validation to catch schema and integrity errors before load, and covered the pipeline with pytest.

REST API Service | Python, FastAPI, Docker

- Built a REST API over a relational database with token based login and request validation.
- Wrote a pytest test suite and packaged the service with Docker.

Low Latency Order Book | C++20, Python, WebSockets

- Built a limit order book with a price and time priority matching engine in C++20.
- Added Python bindings and a WebSocket server that streams market data to a web GUI.

EDUCATION

B.E. Computer Science & Engineering, CBIT, Hyderabad

2018 to 2022

Chaitanya Bharathi Institute of Technology · CGPA 8.8

MBA in Finance, UCCBM, Hyderabad

2024 to 2026

University College of Commerce & Business Management · CGPA 8.9

RELEVANT COURSEWORK

Data Structures & Algorithms, Operating Systems, DBMS, Computer Networks, Object Oriented Programming, Design & Analysis of Algorithms, Software Engineering, Computer Architecture

CERTIFICATIONS

HackerRank: Problem Solving and Java (Basic) Programming

NISM Series-XV: Research Analyst (SEBI/NISM), Reg. No. NISM-202600123995

ACHIEVEMENTS

- GATE CSE 2021: top 5% among national candidates in Computer Science.
- UGC NET 2025 (Management): 95.6 percentile.
